

Turnitin Originality Checking software allows educators to check students' work for improper citation or potential plagiarism by comparing it against continuously updated databases. nLearning ([www.nlearning.co.uk](http://www.nlearning.co.uk)) is a leading provider of consulting and software services for academic integrity in Europe, supporting the adoption of Turnitin in over 650 academic institutions (including 97% of UK universities). Established in 2002, nLearning promotes a holistic approach to addressing plagiarism, through a combination of good institutional and academic practice, student study skills and detection. The nLearning advisory and training service, [plagiarismadvice.org](http://plagiarismadvice.org), offers consultancy and guidance for institutions and national government bodies. Much of the material produced is subsequently available at no cost to the community from our [plagiarismadvice.org](http://plagiarismadvice.org) website, and at our biennial international conference on plagiarism prevention ([www.plagiarismconference.org](http://www.plagiarismconference.org)).

To discuss a short free trial and for further information come to the British Institute For Learning & Development (BILD) Pavilion Stand C120 in the Winter Garden.

Also, on Thursday December 3<sup>rd</sup> 2009 at 1430 Will Murray (CEO nLearning) will be speaking about "Tackling Plagiarism now and in the Future".
